

Practising Number Facts – Session 3

Remember, it's important to try your best and it isn't a requirement to complete every part of the sheet.

If you can do the challenge, that's brilliant but don't worry if you can't.

Learning objective: To use our understanding of partitioning and number facts to add.

Part 1

Use your doubles to calculate these.

$1 + 1 =$

$2 + 2 =$

$3 + 3 =$

$4 + 4 =$

$5 + 5 =$

$6 + 6 =$

$7 + 7 =$

$8 + 8 =$

Part 2

Use your doubles to solve these near double calculations.

$1 + 2 =$

$2 + 3 =$

$3 + 4 =$

$4 + 5 =$

$5 + 6 =$

$6 + 7 =$

$7 + 8 =$

$8 + 9 =$

$9 + 10 =$

Part 3

For these number sentences I have used the skill of bridging to solve the calculations quickly.

E.g. $6 + 5 = 11$ I know this because $6 + 4 = 10$ then add the 1.

$6 + 9 =$

$8 + 4 =$

$7 + 5 =$

$9 + 6 =$

$8 + 3 =$

$6 + 8 =$

$7 + 9 =$

$5 + 8 =$
